ASATT25RD01	TT 25 rail 12V DC	605	555	421	208,5	417	530	266	6	22,7
ASATT25RD02	TT 25 rail 24V DC	605	555	421	208,5	417	530	266	6	22,7

Radiator Style B

material:	aluminum
working temperature range:	-20°C to +80°C (oil temperature)**
air fin shape:	wavy
working pressure:	26 bar (static)

Installation System (asa rail connectors)

connection BSP 1"	ILLZSET5G25 (1 set per cooler required)
connection BSP 1 1/4"	ILLZSET5G32 (1 set per cooler required)
connection BSP 1" straight	ILLZSET5G25A (1 set per cooler required)
connection BSP 1" straight+stnd.	ILLZSET5G25B (1 set per cooler required)

*...the indicated temperature is the maximum inlet temperature for the cooler radiator. Depending on the sealings in use, the application needs appropriate checking.

This data sheet and the corresponding scale drawings are to be used as a general guideline and technical overview of our products. Please contact us if more exact information is needed. As we are constantly improving our products, their characteristics, dimensions and weights may also change, although we do our best to incorporate these changes continually. asa assumes no liability for any information therein, any errors, omissions, misprints, nor any direct or indirect damages, losses or costs resulting therefrom. Any cooling performances and general technical values indicated in this catalogue are measured at a test bench according to asa testing procedures or calculated, based on such tests. Because there is no standardized testing procedure, tests used by other manufacturers could have different results. Due to different conditions in testing and application environments the cooling performance may also vary by +/- 15%. Therefore we recommend all products to be checked under the system operating conditions. This is also true of vibrations and mechanical stress as well as for pressure peaks and thermal stress and any other relevant factors. General tolerances according to DIN ISO 2768-v. General tolerances for casted parts according to EN ISO 8062-3 (DCTG 10). Tolerances for rubber parts are according to ISO 3302-1 (class M4-F+C). The tolerances of welding seams are defined by quality group D according to EN ISO 10042, if it is not specified on the actual scale drawing or data sheet. In addition to that we point out that any data sheet and corresponding scale drawing is no substitution for the manual.

Options

temperature control	ILLZTC12-2K or 24-2K + ILLZTT5069K (page 37, 38)
temperature switches	ILLZTH5069K, ILLZTH4765K, ILLZTH6065K (page 39)
protection housings	available for sizes TT 07, 11 and 16
foot mounting	ILLEFUSSTTHDK (page 35)
internal bypass	alternative bypass settings (1bar / 5bar)

Please contact us for further options and assistance, read manual before installation!

Accessories

Connector TT rail Series

Description

The asa rail system is the first worldwide flexible mounting and connection system for air blast heat exchangers. The flexibility comes from free choice of the port's direction. Each port on the radiator has 3 possibilities. This well designed radiator concept brings another flexibility innovation hit to the standard cooler market: The oil flow direction can be chosen between u-flow direction and diagonal oil flow on each TT rail cooler!

The radiator rail slots are not only for connecting the hydraulic ports, it is also possible to have the system attached with e.g.: bypass systems, mounting of the cooler to an aggregate, measurement devices, and much more. Please contact us to discover the huge potential of this rail system for your application.
